ABOUT :

The objective is to hone the skills of researchers in preparing their work for publication. While researchers and academics are under constant pressure to publish their work in scholarly journals, not just for jobs and promotions but also to qualify for doctoral degrees, many find that they have not received the training necessary to produce work of publishable quality.

The sessions will focus on issues such as: the essentials of a good scholarly article; constructing an original argument; good research methodology, particularly in the context of writing about medical scientific literature; the style of writing suitable for scholarly work; reviewing the work of others; plagiarism; and proofreading, editing and revising an article.

NARAYANA
MEDICAL COLLEGE

CME
for **FACULTY &**
POSTGRADUATE STUDENTS

21 – 22 JUNE 2019

RESEARCH METHODS
FOR
DISSERTATION AND PUBLICATION
