Rally on World Suicide Prevention Day and Awareness Program 10/09/2022

September 10th is celebrated worldwide as World Suicide prevention day. An initiative by World Health Organization, International Association for Suicide prevention. The triennial theme chosen for the years 2021-2023 is "Creating hope through action". Every small action is a gesture to those with suicidal thoughts and can bring hope about a positive life. To commemorate this event, an awareness program was organized by Nellore psychiatric society, Department of Psychiatry of Narayana Medical College, NSS Units of Narayana Medical College, Narayana College of Nursing and Sri Narayana Nursing College, and Nellore Police Department. Following persons participated in the event Dr. Ramesh Balaji, President of Nellore Psychiatric Society, and the Superintendent of Police, Ch.Vijaya Rao, Additional SP Mrs. Himavathi (crime), Additional SP Mr. Abdul Shubhani (admin), Additional SP Mrs. Chowdeshwari, NSS program officers Dr M Prasad, Ms. Pallavi, Ms. Esther and Medical Students, Nursing Students and NSS volunteers. The program commenced with Welcome speech and messages by dignitaries followed by pledge administration by Dr. Gangadhar, later a Rally conducted from VRC to Mahatma Gandhi statue to create awareness about suicidal prevention. Lets hope for a Society where talking about suicide is normalised and people with such intentions are looked out for and given help at the right time and with DR Prasad NSS programme officer and 50 NSS volunteers and 100 students are participated with slogans band karo band karo suicide karna band karo and live the life leave the suicide.

Special 35000

DAY – 2 16-09-2022

Session: 01

Resource person: Prof UdayBhaskar Reddy

Topic name: Environmental protection "Global warming " Causes, consequences

Sir explained about role of NSS and NSS PO'S in community services for environmental protection NSS is selfless service for development of community as well as personality development of volunteers.

Chlorofluorocarbons (CFC'S) are non-toxic non-inflammatve chemicals contains atoms of carbon ,chlorine and fluorine .They are used in the manufacture of aerosol sprays ,blowing agents for fumes and packing materials as solvents and as refrigerates.

Large amount of reactive stratospheric chlorine in the forms of chlorine monoxide (CO) that could the ozone layer and observed by instrument 1992.

Use of CFC'S some chlorinated solvent should become obsolete in the next decode if the mounted protocol is observes by all parties and substitutes are uses. Today science is tomorrow nonsense finally information is "plant montunoes green cover green power any green Tech "

Session – 02

Tea Break: 11: 30 to 11: 40

Resources person :Dr.Anasuya Devi garu , St. Joseph college of women

Name of the topic: Regular activities

First half :

V.Sony(Asst.Professor) 57 joseph talked about nutritional transition and disease in the community poshanabhiram.

Aim : Stunting of children

WW birth weight of babies

M. Prang

Programme Officer
NSS UNIT

NARAYANA MEDICAL COLLEGE
Chinthareddypalem, NELLORE-3.

Principal
NARAYANA MEDICAL COLLEGE
Chinthareddypalem, Nellore-3

Under nutrition

Prevalence anaemia

Objectives :

1. Prevent and reduce stunting children (0-6 years)
2. Prevent and reduce under nutrition (under weight prevalence) in children (0- 6 years)
3. Reduce the prevalence of anaemia among woman and adolescent girls in the age group of 15- 49 years.
4. Reduce the prevalence of anaemia among young children (6- 59 months)
5. Reduce low birth weight (LBW)
6. Vitamin B12 folic acid important for anaemia.
7. Micro nutrients vitamins & minerals.
8. Micro nutrients carbohydrates ,fats.
9. We can't strip carbohydrates fats.

Classification based on weight for age :

- ≤60 % weight for age – grade III malnutrition
- 61-75 % weight for age – grade II malnutrition
- 76-90% weight for age – grade I malnutrition
- ≥ 90% weight for age –Normal

Classification based on height for age stunting

- ≤85% expected height for age – severe retarded
- 85-90 % expected height for age – moderate retardation
- 90- 95 % expected height for age – mild retardation
- ≥95% expected height for age – normal.

Presumptive Diagnosis BMI

Chronic	Energy deficiency Grade – III severe	< 16.0
Chronic	Energy deficiency Grade – II moderate	16.0 -17.0
Chronic	Energy deficiency Grade – I mild	18.5 – 20.0
ww weight normal		20.0 – 25.0

1. Essential aminoacids eggs, milk
2. Non- essential aminoacids cereals ,pulses etc
3. Pregnant women needs 2000 % 300 k.cal need extra 15 gms proteins

4. Anaemia , gulimia , binzeating leads to adolescensceanaemia
5. Hygiene is important.
6. Quality of food is important not the quantity.

Second half

1. Vedula .Narasimham(public relation officer) journalist , all india radio give important instructions to PO'S how to prepare press report and important contents.
2. Publicity is important
